Subject: Review of the "Toxicological Review of Formaldehyde -Qverview" (draft final)

I have thoroughly review the Formaldehyde Overview.

It is excellent!! The science is clear, well crafted and accurate. Multiple approaches to estimating risks, as well as potential uncertainties, were thoughtfully considered. The new systematic tools add clarity to the process. I do have not comments that affect the science or the interpretation of the science. **Congratulations to the team.**

I provided number of small editorial or format suggestions. These can be addressed (or not) at the discretion of the chemical managers or passed on the tech editors. If you choose to incorporate these comment I would do so in your master copy. Im using a newer version of Word and if you used my copy it might introduce errors.

My comments on the remainder of the Toxicological Review are pending. I had hope to have them to you by now but it will be next year.

Thank you for the opportunity to review this document. Call me at 720-665-3026 (cell) or 303-494-8551 (land line) if you have questions.

Happy New Year Everyone
